

An encyclopaedia of civil engineering, historical, theoretical, and practical Volume 0

By Edward Cressy

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 1018 pages. Dimensions: 9.7in. x 7.4in. x 2.0in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1865 Excerpt: . . . and fit for use. It is known that the point A at the corner of the house B is on a true level with the cill of the window of the inn D at C: centre the telescope to that level in such a manner that the thread always cuts the same point pig. 917, when turned either way. The Spirit Level in general use, of the most convenient and improved form, has a telescope ah, supported at each end, and a spirit level below it, inclosed in a brass tube, with a piece of glass let in at the upper side, to observe the position of the air bubble: the instrument has a compass usually attached to it. By means of the socket F, and the screw below, the telescope may be raised or lowered at pleasure; on the plate M are four levelling screws,...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
